SUMMARY

Results-driven Data Engineer with around 4 years of experience building scalable, high-performance data solutions using **Azure Data Factory, Databricks, Synapse, PySpark, and SQL**. Skilled in data modeling, ETL optimization, and cloud data warehousing, ensuring quality, reliability, and business-ready insights. Adept at collaborating across teams to deliver data-driven impact, automation, and efficiency in analytics workflows.

CORE SKILLS

• **Azure Databricks** • **Azure Data Factory** • **Azure Synapse** • **Power BI** • **AWS Glue** • **Snowflake** • **PySpark** • **Spark** • **Scala** • **SQL** • **Python** • **Data Modeling** • **ETL**

WORK EXPERIENCE

AUG 2022- PRESENT

TCS-General Motors–AzureData Engineer

- Designed and developed scalable ETL pipelines using **Azure Data Factory** following the Medallion Architecture (Bronze–Silver–Gold layers) to enhance data quality, lineage, and processing efficiency across analytical systems.
- Integrated diverse data sources such as Data Lakehouse, handling multiple file formats including **CSV, XML, JSON and Parquet** for seamless ingestion and processing.
- Developed and optimized **PySpark scripts** for data quality validation, anomaly detection, and reconciliation across raw and curated zones, achieving 98%+ accuracy and reducing manual QA effort by 80%.
- Performed complex data transformations, optimized Spark workloads in **Azure Databricks**, improving performance and runtime efficiency through partitioning, caching, and cluster configuration tuning.

TCS – Bancs Projects - Data Engineer

- Built and optimized data pipelines in **Azure Synapse Analytics** for ingesting, transforming, and aggregating large-scale customer and operations data.
- Designed and published **Power BI dashboards** leveraging Synapse datasets, enabling real-time business insights and KPI tracking.

TCS – Marriott International (Internship)

FEB 2022- JUN 2022

- Built and optimized data pipelines on **AWS using Snowflake, S3, and Lambda**, gaining hands-on experience in data modeling and ETL best practices.
- Automated data ingestion from multiple internal and third-party sources into Snowflake Data Warehouse, reducing manual effort and refresh time by 70%.

EDUCATION & CERTIFICATIONS

St Xavier's College (2020-2022)

Masters of Science in Big Data Analytics

JNVU Jodhpur

Bachelors in Computer Applications
