SUMMARY

Azure Data Engineer with 5.1 years of experience in designing, developing, and managing enterprise data systems. Proficient in Microsoft Fabric, Azure Data Factory, SQL, and Python, with a strong focus on ETL design and modern data architectures such as Medallion and Lakehouse.

SKILLS

• Azure Data Factory	• Azure Databricks	• Microsoft Fabric	• Data Migration	• SQL
• Azure Data Lake	• Azure Synapse Analytics	• Data Warehouse	• Incremental Loads	• PySpark
• ETL/ELT Pipelines	• Data Modeling	• Azure DevOps	• Medallion Architecture	• Python

WORK EXPERIENCE

GLOBESTAR SOFTWARE LIMITED (Data Engineer Associate) Gurugram, Haryana 16th June 2025 – Present

- Assist in building, maintaining & supporting data pipelines that extract, load (ETL/ELT) data from various sources
- Work with tools and technologies (e.g., SQL, Python, Azure/AWS/GCP, Data Lake, Data Warehouse) to ingest, clean, validate, and store data efficiently and reliably.
- Collaborate with the team to design and implement data models that support business intelligence and reporting needs.

TCS (Senior Process Associate) Mumbai, Maharashtra 29th May 2024 – 13th June 2025

Worked as part of an internal initiative to support data migration and analytics setup within the organizations.

- Assisted in the migration of data from on premises system to Azure Data Lake Gene2.
- Collaborated with senior engineers to optimize ETL workflows and troubleshoot pipeline issues.
- Developed PySpark and SQL scripts to automate data transformation processes. Monitored and debugged pipeline failures, ensuring timely fixes for production issues.

Teleperformance (Process Associate) Mumbai, Maharashtra 28th Feb 2022 – 30th April 2024

- Handled data-related activities in a BPO environment, ensuring accurate data processing, validation, and reporting.
- Internally supported the data engineering team in cloud data migration.
- Assisted in data extraction, cleaning, and transformation using SQL, Excel, and Azure Data Factory under the supervision of the data engineering team.

Accenture (Associate) Mumbai, Maharashtra 6th July 2018 – 1st Nov 2019

- Processed and validated insurance claims for US-based clients, ensuring accuracy, compliance, and timely completion.
- Reviewed claim forms, medical documents, and policy details to verify eligibility, coverage, and claim authenticity.

PROJECTS

Waste Management and Recycling (Technologies: Microsoft Fabric)

- Designed end-to-end data pipelines in Microsoft Fabric for multi-source ingestion and transformation.
- Built Bronze-Silver-Gold Lakehouse layers for structured and scalable data flow.
- Implemented incremental load logic using LastRunTimestamp to eliminate duplicate ingestion.
- Applied data quality and validation checks to ensure accurate recycling metrics.
- Automated workflows using Fabric Data Pipelines and Dataflows Gen2.

Migration of Logistics Data (Technologies: Azure Data Factory)

- Migrated legacy logistics data from on-prime SQL and flat files to Azure cloud using ADF.
- Built parameterized, reusable pipelines for scalable ETL across warehouses and shipments.
- Applied incremental load (Watermark/LastRunDate) to process only changed data.
- Utilized mapping data flows for data cleansing, schema mapping, and key generation.
- Integrated lookup, conditional, and ForEach activities for complex business logic.
- Configured pipeline monitoring and alerts via Azure Monitor and Log Analytics.

EDUCATION

M.com in Business Management (Model College)

2018 - 2019
