

Akash Shukla

Senior Data Engineer

BI Engineer skilled in Azure Data Engineering, Snowflake, Lakehouse architecture, and Power BI, with expertise in building scalable data pipelines, optimizing SQL, and delivering actionable insights through interactive dashboards.

WORK EXPERIENCE

Consultant

Celebal Technologies

09/2025 - 11/2025

Achievements/Tasks

- Worked on a **data migration project** using **ADF** to orchestrate data ingestion from on-prem and cloud sources into Azure Data Lake.
- Developed **PySpark transformation pipelines** in **Databricks** to clean, validate, and standardize data using Delta Lake and medallion architecture.
- Performed large-scale data loading and optimization using Azure Synapse, ensuring schema alignment, performance tuning, and accurate end-to-end migration.

Senior data analyst

Yalantis technology

02/2025 - 06/2025

Client Learning Mate - Ed-tech Company

Achievements/Tasks

- Built and orchestrated **ETL pipelines using ADF** to ingest data from on-prem SQL, REST APIs, and cloud storage into Azure Data Lake.
- Developed **PySpark transformation jobs** to clean, standardize, and enrich data, implementing Delta Lake and optimizing performance.
- Loaded curated data into **Azure Synapse (SQL Pool/Dedicated Pool)** with proper schema mapping, indexing, and performance tuning for analytics and reporting.

Senior Data Engineer

LTiMindtree

01/2024 - 05/2024

Mumbai

Data Integration and Migration Project using Py-spark, Python and Snowflake. Also implemented Power BI Report in Downstream.

- Writing, optimizing, and troubleshooting SQL queries within the Snowflake environment. Integrating Snowflake with various data sources and third-party tools. Understanding basic performance concepts like clustering keys and virtual warehouses.
- Designed Lakehouse architecture to store and process large-scale data efficiently using OneLake and Delta Tables. Developed Data Pipelines and Notebooks for ETL workflows, optimizing performance and cost efficiency.
- Worked on Power BI as a downstream analytics layer, connecting datasets from Snowflake, building interactive dashboards, and optimizing reports for better performance and usability. Implemented RLS and workspace management in Power BI Service for secure data access and controlled sharing.

Senior Data Analyst

Eclerx

11/2021 - 10/2023

Achievements/Tasks

- Understand business requirements in the BI context and design data models to convert raw data to meaningful insights for the Citi Bank.
- Utilize Power BI to build interactive and visually appealing Credit Risk dashboards and Reports for the Citi Bank. To perform DAX queries and functions in Power BI also perform SQL querying for best results to the client.

SKILLS

Python

Power BI

SQL Server

Snowflake

Data Warehouse

Advance Excel

ETL

Azure Data Bricks

Power BI Service

Azure Data Factory

Data Visualization

Data Lake

PySpark

Microsoft Fabric

Google Big Query

DBT

PERSONAL PROJECTS

Azure Data Factory for Data Engineers - Project on Covid19 (06/2024 - 09/2024)

Microsoft Power BI Desktop for Business Intelligence. (07/2024 - 11/2024)

Data Factory on Azure and Microsoft Fabric, Azure DevOps (CI/CD), Azure Data Lake, Azure SQL (06/2024 - 12/2024)

Snowflake – The Complete Masterclass

EDUCATION

B.E in Electronics and telecommunication

Mumbai University

06/2013 - 07/2017

61%

INTERESTS

Playing Outdoor Games

Travelling

Listening Music

Support Analyst **Northern Marine Management**

03/2020 - 10/2021

Achievements/Tasks

- Design, develop, and maintain SQL Server databases, tables, views, stored procedures and functions. Optimize SQL queries for performance tuning and troubleshooting slow-running queries.
- Design, develop, and deploy SSIS packages for ETL (Extract, Transform, Load) processes from multiple sources (SQL, Excel, CSV, APIs, Cloud, etc.) into data warehouses. Optimize ETL processes for scalability and performance.
- Develop, deploy, and manage SSRS reports and dashboards based on business requirements. Ensure report performance optimization and maintain report versioning.

SQL Engineer **MITS Global**

07/2019 - 02/2020

Achievements/Tasks

- Provide production support for SQL Server databases, ensuring availability, reliability, and performance.
- Troubleshoot database-related incidents, including deadlocks, long-running queries, and connectivity issues.
- Assist development teams in debugging SQL queries, stored procedures, and data-related issues. Work on user requests such as data fixes, ad-hoc queries, and report generation.
- Generate daily, weekly, and monthly reports for management decision-making. Perform data validation to ensure accuracy and consistency of MIS reports.
